Dear Search Committee,

I am writing to express my strong interest in this faculty position. With a Ph.D. in Epidemiology from Johns Hopkins University and seven years of experience at the intersection of data science and public health, I am eager to contribute to your department's research and teaching mission.

In my current role as Assistant Professor of Epidemiology at Emory University's Rollins School of Public Health, I teach graduate-level courses in biostatistics and applied machine learning for health data, mentor doctoral students, and lead an active research program. My work focuses on the application of AI and computational methods to large-scale population health datasets, with publications in peer-reviewed journals including *JAMA Network Open* and *PLOS Medicine*.

I am a committed educator who believes rigorous quantitative training should be accessible and meaningful to students from diverse disciplinary backgrounds. My teaching evaluations consistently reflect strong student engagement, and I have developed curriculum that integrates real-world case studies with foundational methodology. I would welcome the opportunity to extend and adapt that curriculum for your students.

I am excited by the prospect of joining a community of scholars dedicated to advancing public health through innovative methods. I am confident that my background in both applied research and teaching makes me a strong fit for this role, and I look forward to the possibility of discussing my application further.

Sincerely,

Marcus Tobias Reyes
